October 2002

Welcome to the 2001 SMSA *State Motorcycle Program Survey*. The survey has long been the most comprehensive compilation of information concerning state-legislated motorcycle safety programs ever gathered. Our members, and many others, have come to rely on the data contained in the survey to review demographic trends, compare program elements, establish goals and direction, as well as generate interest in, and support for, motorcycle safety programs. It provides a valuable cross section of the national training effort. This survey is the result of our members' effort and dedication to communicate with each other and with those who share our interest in motorcycle safety.

The SMSA has provided this survey since the 1980's and has faced many challenges over the years in gathering and compiling the extensive information required to make the survey the viable document it is. This year, the SMSA Executive Committee contracted with iExchange to create an on-line survey that will only require annual updating by our members instead of "starting from scratch" every year. This new technology is exciting, but not without its own challenges. This is our first effort in an electronic format, and we realize that modifications, streamlining, additions and deletions will be required in the future. Suggestions and comments are welcome and encouraged.

State motorcycle safety programs continue to be challenged with restricted funding, increasing enrollments and higher costs for delivering motorcycle safety courses. Our goal is to meet those challenges with quality programs that result in safer motorcycling while enhancing the motorcycling experience. Our partners in motorcycle safety can help make the difference. We look forward to an exciting future that will involve more partners and more resources to assist our members in reaching their goals.

If you are seeking information concerning motorcycle safety education and training, the SMSA is your source. We are the professionals who manage state training programs, train instructors, and help those who desire to learn how to ride or hone their skills to do so. We invite you to contact your home state program coordinator or the SMSA (www.smsa.org) for more information.

Sincerely,

Ronald E. Shepard
Chairperson
