Describe it (q7137)

- CA when the bike becomes unsafe for training it is replaced
- IA Based on the availability of funds, a sponsor may apply for 50% replacement costs
- ID 5-6 year rotation
- MD Our annual appropriation allows us to replace (3) bikes per year. There is an initiative process that must be completed for more.
- MN The goal is to retire a bike at 15 years of service.
- NC 2 to 3 new loaners per site per year, allowing replacement of the entire fleet every 6 years
- ND Trade in motorcycles every 5 years.
- NV 10 year replacement
- OH We have budgeted for 100 motorcycles for each of the next two years.
- PA Strategic Inventory Plan is based on funding, mileage and overall condition
- VT The program purchases 10 - 12 motorcycles each year. These motorcycles are used to open an additional site or replace aging motorcycles.

Describe it (q7139)

- CA The bikes are inspected after every training session/season
- ID Owners manual
- MD Regular maintence is done annually prior to the training season. Other items are maintained according to their useful life on a rotating basis.
- MN mechanic on contract
- NC Lead instructor at each site performs annual and preventive maintenance. State office performs major repairs.
- ND Every spring and fall
- NM RiderCoaches identify mechanical/damage problems at end of each class; Site Coordinators perform maintenance before units are used for the next class.
Inventory control records are kept that document maintenance activities. Individual training sites are responsible for routine maintenance during the training season. In the off-season, motorcycles are serviced according to a service plan at a central maintenance facility.
- NY
- OH We service all our program bikes annually during the winter. During the training season they are serviced and maintained by our sponsors.
- OR Quarterly service; annual detailed maintenance.
- PA A maintenance checklist is completed on each motorcyle and records are stored in database starting 2009
- WA Only on state owned but all motorcycles are required to be nmaintained in a manner to provide safe operation in a training environment
