## Helmets Manufactured in America

Does anyone know of any helmets that are DOT, ECE, and Snell certified that are manufactured in America?

### VIRGINIA

Andrea, not sure if you checked with Bell helmets. The company started in US. Not sure if they still make them here. <http://www.bellhelmets.com>

~Bruce Biondo

### MARYLAND

Andrea,

I do not know. The likelihood of finding a USA Made helmet that meets all three certifications will be very, very, very hard.

If your intent is to buy range helmets, the DOT certification is all that is necessary. From the information I have an ECE stand is not any better than DOT and even though having a Snell certification is nice it could add to the cost of a helmet.

~Phil Sause

### MICHIGAN

Only one I am aware of is Seer.

~Chad Teachout

### MARYLAND

This is good to know.

~Phil Sause

### MICHIGAN

If you're looking for helmets for the training program, I would talk to Edie Peters with the Florida program. They did a BA helmet waiver early last year because of this.

The SEER helmet is the only one I know of that is still US made.

\$ !!!

**~Chad Teachout**

**FLORIDA**

I am working on Waiver for this year also and NHTSA has it. I am now just waiting on an answer. Super Seer is only company who makes Helmets in US, but the variety is limited and they costs more.
