Program Mechanic Salary

Colleagues,

If you employ your own motorcycle mechanic/s would you please let me know what salary you pay? If possible, I would appreciate it if you could break it down to an hourly pay scale as I don't want to get into the more complex shop rates. I want to be sure I am paying an amount that is competitive with what is being paid elsewhere. I'm referring to more than just oil changes, etc. We have a few instructors that assist with maintenance that ranges from the simple to beyond general maintenance such as engine work and more complex repairs/maintenance. Any information you can provide is appreciated.

Thank you,

Rick
