### **ATK GV250**

For those of you using ATK GV250 motorcycles in your programs, have you had any issues? I read a few years ago they had charging issues and I am concerned that with all the starting and stopping on a range there may be problems.

#### **VIRGINIA**

Pete, we do not have any of the ATK GV 250 in the program.

~Bruce Biondo

#### **INSTITUTE OF PUBLIC SAFETY**

Peter, the ATKs seem to run ok. Their foot pegs are extremely fragile. They are not easy to work on but they have done me as good of a job as the GZ 250 Suzukis. The price was right when I bought the ones I have. Good luck if you can get them to begin with. I know that Michigan was trying to buy a bunch but last I heard they were not able to get them.

~Dan Terry

#### **OHIO**

Ohio does not use the ATK GV 250

~Chuck Stiteler
